

## HR-1 Toilet Riser

**Save Money**

**Reduce Vandalism**

**Meet ADA Regs**

The Model HR-1™ Toilet Riser enables your Microflush® Toilet to meet ADA handicapped requirements by raising the bowl up to the required 18" height.

The HR-1™ Riser saves you money by being more secure from theft and vandalism than a 3" lift toilet seat because it's located between the floor and your Microflush® toilets.

It is specifically designed to match the base of Microflush® china toilets, giving your restroom facilities greater aesthetic appeal compared to heavy lift toilet seat or raised concrete bases.

The HR-1™ Riser works with both rear and downward discharge toilets. It is easy to install and mounts to the floor using a standard floor flange and wax ring. Then, simply mount your Microflush® toilets like normal. Downward discharge models use a standard wax ring and the extended closet bolts provided. It's easy!

The HR-1™ Toilet Riser is made of durable cultured marble to resist stains and moisture, giving you a longer service life.
